*Metadata for the clean version of dataset S24f2 also known in the RStudio script as numerical_overall

Name of Column	Description	Datatype
year	The years in which the observations in subsequent columns are from.	numeric
men_overall	The number of men who graduated from Danish higher education	numeric
women_overall	The number of women who graduated from Danish higher education	numeric
share_women_overall	The percentage of all graduates from higher education that were women	numeric

*Metadata for the clean version of S24f3 also known in the RStudio Script as numerical_specific

Name of Column	Description	Datatype
year	The years in which the observations in subsequent columns are from.	integer
men_teacher	The number of men who graduated as teachers in Denmark	numeric
women_teacher	The number of women who graduated as teachers in Denmark	numeric
share_women_teacher	The percentage of graduates from the study of teaching in Denmark that were women	numeric
men_lawyer	The number of men who graduated from law school in Denmark	numeric
women_lawyer	The number of women who graduated from law school in Denmark	numeric
share_women_lawyer	The percentage of graduates from law school in Denmark that were women	numeric

men_doctor	The number of men who graduated from the study of medicine in Denmark	numeric
women_doctor	The number of women who graduated from the study of medicine in Denmark	numeric
share_women_doctor	The percentage of graduates from the study of medicine in Denmark that were women	numeric
men_priest	The number of men who graduated from the study of theology in Denmark	numeric
women_priest	The number of women who graduated from the study of theology in Denmark	numeric
share_women_priest	The percentage of graduates from the study of theology in Denmark that were women	numeric

*Both datasets come from "Kvinder og mænd i 100 år – fra lige valgret til ligestilling. 1915-2015" created by Danmarks Statistik. Use of the dataset for this project has been granted by the main author of the publication. For the purposes of this metadata table, a cleaned version with English column names has been used. From S24f2 only the table "Videregående uddannelser (fuldførte)" has been included, as the other tables in the spreadsheet are of no relevance for this project.
